

# Assistant Operator-Leachate Treatment/Landfill Gas Collection

Ocean County Landfill Corp. is seeking an Assistant Operator for its Leachate Treatment Facility/Landfill Gas Collection System at its location in Manchester Township, New Jersey.

The following experience/skills are desirable for this position:

- Wastewater treatment plant experience helpful but not required
- Landfill gas collection and flaring systems
- Mechanical/electrical experience
- Experience with pumps, piping, and valves
- Computer skills
- Must be willing to work nights/weekends and to be on call
- Must hold or be willing to obtain New Jersey Industrial Wastewater Treatment Operator's License (N-License)

## JOB DESCRIPTION:

- Maintenance and operation of Leachate Treatment Facility (LTF) and Landfill Gas Collection System (LGCS)

Duties include but are not limited to:

- Maintenance, operation, and troubleshooting of process control, pumps, blowers, motors, engines, generators, etc. associated with the operation of LTF and LGCS, during normal working hours as well as on nights and weekends, including alarm calls, as required
- Daily monitoring and recording of process control readings and entry into computer system
- Perform process control sampling and testing
- Operation of LTF via computer system
- Use of respirators and confined space entry for maintenance and operational activities
- Routine manual labor requiring physical endurance, such as maintenance and janitorial work to maintain facilities in a well-kept condition
- Walking up and down 3:1 slopes to access landfill gas control valves for monitoring and adjustment
- Occasional heavy lifting

Salary is commensurate with experience; competitive benefits package provided.
